The primary focus of the ESSER funds is to provide a safe learning environment for staff and students while focusing on learning loss and educational needs for current and future students and staff.

CACS is and will be using the funds to improve the safety of our buildings by addressing some needs in heating and air, flooring (asbestos), and other structural needs that when completed will improve air quality and environmental concerns. These improvements will include replacing the water tower in Centerville Junior High School, floors in Rose Hamilton and Centerville Senior High School, and windows in the old portion of Centerville-Abington Elementary.

Additionally, we have hired two instructional coaches to assist teachers in analyzing data and structuring training to help teachers meet the needs of students who have fallen behind during the last couple of years due to disruptions from closure or quarantining. These positions will be funded for the next three years. The money to fund training will also be taken from the ESSER funds.

To prepare for future needs, all building laptops and new technology programs will be purchased using ESSER funds. This will provide the students with new laptops or Chromebooks and allow teachers to update their curriculum and purchase materials for the classrooms. Additional funds will be provided to help teachers and buildings purchase curricular materials to address learning loss and social-emotional education.

ESSER funding distributed to Centerville-Abington Community Schools expires in the spring of 2024, so the agreed upon upgrades and improvements will occur over the course of a three year budget cycle. A breakdown of this 3 year budget is provided:
